INTRODUCTION

Our New Product Catalogue for November 2010

Welcome to our new Product Catalogue. We are very proud to have included a considerable number of new products in our range this year and are sure that you will benefit from the additional areas we are now able to help you assess.

Employee assessment, whether for selection or development can be a complex area. Our expertise lies in offering you consultancy to assist you in your choices of the ideal assessment battery, no matter what your needs.

To help you with your choices we have put together below a series of TRG plus® Matrix Solution Packs. These solution packs are designed to manage the process for you with many of the most popular job roles. Whilst many of our customers utilise these solution packs, there will always be occasions when additional or special assessments are recommended as best practice. We would be pleased to advise you of the best options to suit your needs.

We offer a wide range of tests and assessments from a stable of 'World's Best Practice' suppliers. These are hosted on high security, 128 bit encrypted, web based platforms.

We offer our clients a one-stop-shop online assessment platform, which brings together "best of breed" recruitment, development and skills-based tests from a range of publishers. The platform currently has a wide range of online assessments – covering the whole range of pre-employment and development tools including cognitive ability, skills-based, emotional intelligence and industry specific tools (such as safety and integrity tests). It is designed to streamline the testing function, with the centralised platform allowing the delivery of a single candidate report which aggregates the results of multiple publishers.

We proudly boast exclusive access to the range of instruments from The McQuaig Institute®, the creator of the renowned and highly valid range of personality based instruments which comprise The McQuaig System™. The system includes job modelling tools, candidate assessment for selection and self development modules. The system is an integrated online internet based tool and offers a complete spectrum of contextual reports ranging from selection, through supervision and management, to development. Specialised leadership and sales based reports can be provided and the input documents are available in a range of languages.

You will see from the pricing structure that the solution packs and individual assessments require a very low investment, particularly when compared to the extremely high cost of making a mistake. Our goal is to help you use our assessment batteries to reduce the risk in selecting the right person and increase the effectivity of developing team members already on board. The use of such systems has been reliably shown, time and time again, to provide a very high return on investment, not only in the areas of reduced attrition and increased productivity, but also in some more subtle factors, such as reduced Workers' Compensation premiums and increased customer service indices.

We urge you to contact one of our consultants today on 1300 ROGERS (764377) to discuss how we can help you implement these improvements.

TRG plus® Matrix Solution Packs

TRG plus® Matrix Solution Packs are a great way to quickly and seamlessly assess and select team members against 'ready now' assessment packs comprising recommended solutions based directly on the role type.

Typically, The Rogers Group recommends assessments as part of a solution for a role. TRG plus® Matrix solution packs can be accessed directly over the Internet on the TRG plus® platform, or they can be embedded in your current recruitment and development platform.

Opposite are some of the most popular examples of our Solution Packs.

REMEMBER - The prices you see in this catalogue are what you will actually pay, there are no additional hidden fees and charges. All telephone consultancy about test procedures, results and recommended further action is included. All prices are however, subject to GST at the rate current at time of order.

CATALOGUE OF ASSESSMENT INSTRUMENTS

Introduction

In the following pages are categorised lists of the different styles of assessments available. These range from simple skills and abilities tests through behavioural instruments such as personality or emotional intelligence indicators on to industry specific instruments such as safety questionnaires and call centre audio simulations.

We have formulated three different purchasing plans to cater for the range of organisational needs, from infrequent users to the largest Corporate or Government organisation.

Simply call one of our consultants on 1300 ROGERS (764377) and we will help you determine which plan is best for you, we will even send you a planning graph so you can see how each of the plans perform at different usage levels. If you wish to start conservatively and upgrade later we can offer you additional conversion discounts for upgrading.

Whilst the price structure in our catalogue already reflects discounted rates in many cases, we are always willing to discuss bulk purchase discounts for large users and special cases.

Our client purchase plans are shown immediately below and, on the following pages, are categorised lists of our most popular assessments. We have access to many other forms of instrument for special needs, so please call us first if you cannot find what you are looking for.
